

The Furry Temple

Intro

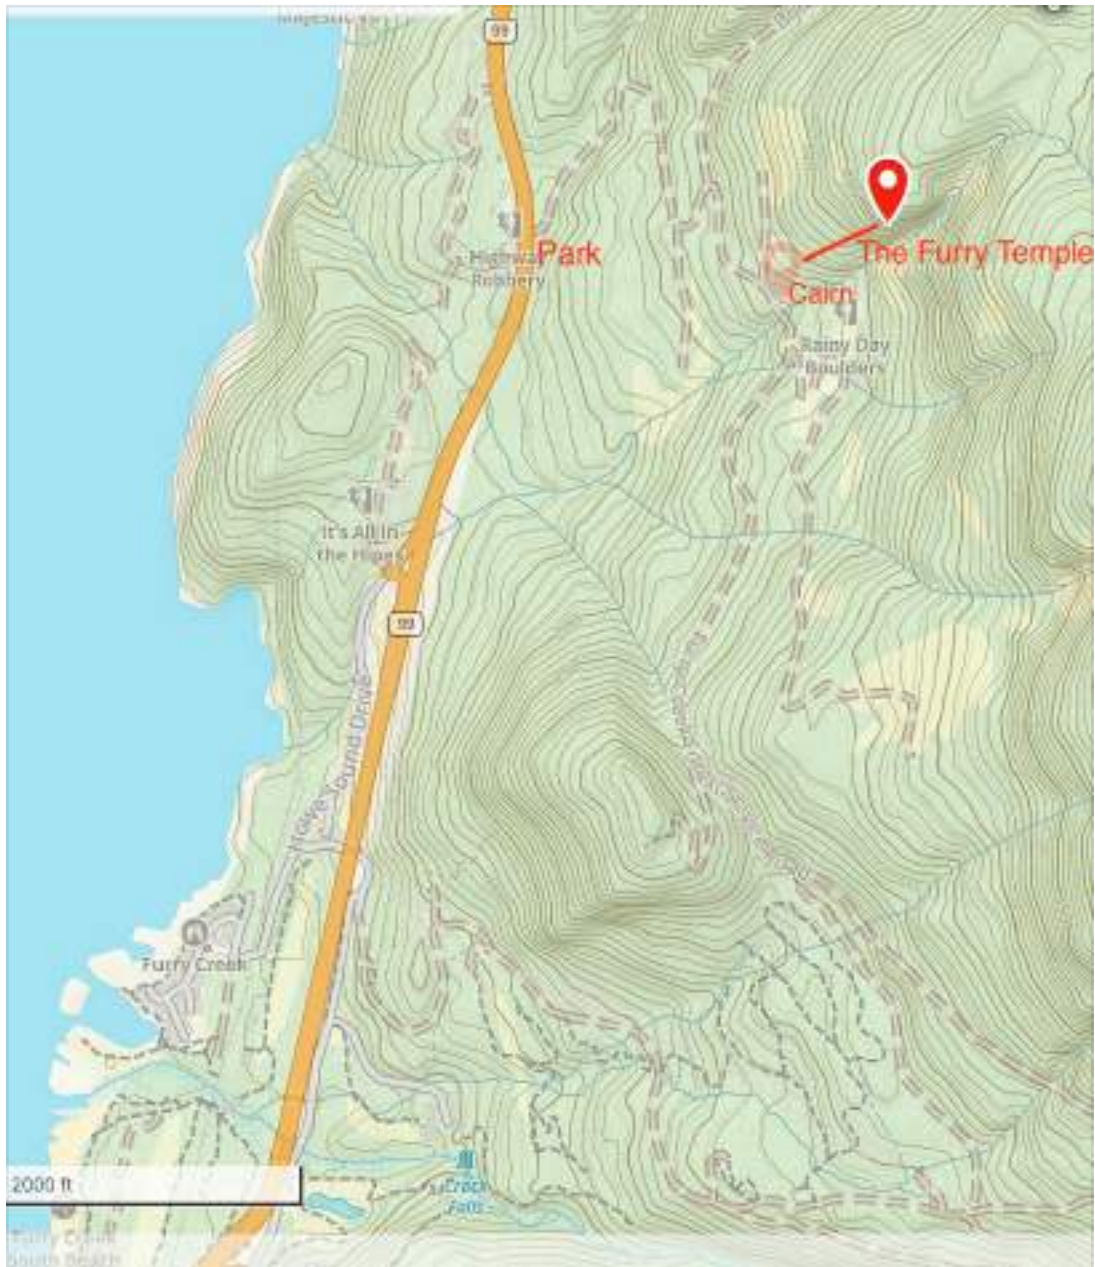

This South facing crag is located in a clearcut, which, for better or for worse, offers panoramic vistas and quick drying stone. The rock is well featured with edges and cracks and has a gritty texture, distinct from the majority of Squamish granite.

The cliff is climbable year round but seeps for a couple days after heavy rains and snows. Summer can be too hot but there is often a breeze that keeps things manageable.

Approach

Park just off the highway at the Furry Creek FSR in the Northbound lane of HWY 99 about 2.2km North of Furry Creek. Do not block the Gate.

Walk the FSR for 1km to the first bridge. Pick up a trail on the left (cairn) which leads to the cliff 200m further.

Anchors

This cliff is equipped with hardware largely contributed by the Sea to Sky Route Development Fund. Please donate generously to this fund at [sea-to-sky-route-development-fund-phase-2](#)

All the routes are equipped with “clip and drop” anchors, Please don't take the carabiners!! Feel free to top rope through them but please replace worn carabiners with one of your own. It's that easy!

Another day at the Furry Temple

Heathen Sector

1. Houses of the Holy 12c 20m 9 Bolts. Technical and strenuous face climbing. FA Ryan Larocque Jan 2024
2. Den of Thieves 10b 6 perma draws 17m Start in the short corner right of the fist bolt FA Paul Mcsorley June 2023.
3. Idolatry 11d 20m micros to 3". Start as for Den of Thieves and climb cracks to a roof. Handrail out right to a flake and eventually a rest. Continue up the thin crack above. Engaging and exciting. FA Paul McSorley Feb 2024
